**PRELIMINARY AMENDMENT**

Sir:

Please amend the above-identified application as follows:

In The Claims:

Please cancel Claims 10, 11, 13-15 and 18-34.

Please add the following new claims:

35. (New). A therapeutic composition for use in treating human disc diseases comprising a carrier in admixture with *in vitro* propagated human intervertebral disc cells, said disc cells being prepared by a method comprising the steps of:
- a) providing a minced human intervertebral disc tissue explant from the group consisting of annulus disc cells, nucleus disc cells and mixtures thereof;
  - b) culturing said minced explant under conditions to propagate and form a monolayer of human intervertebral disc cells;
  - c) isolating the human intervertebral disc cells from said monolayer;
  - d) seeding said isolated cells in said carrier such that the isolated cells are dispersed and distributed in the carrier forming a three-dimensional structure; and
  - e) culturing said dispersed and distributed cells in said three-dimensional structure.
